

Curved track

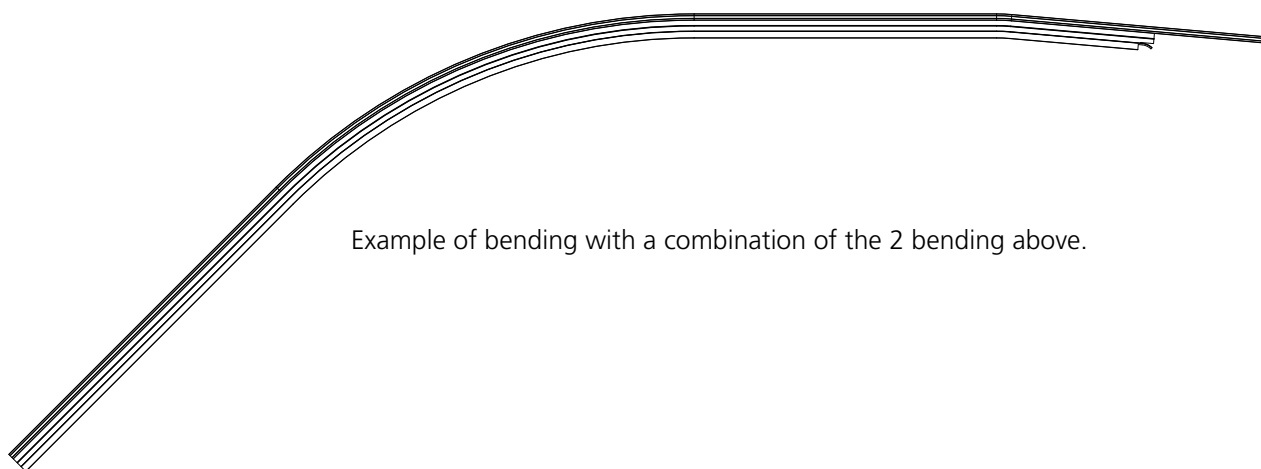

A track bending is possible in option according to a drawing provided by the customer. The technical specifications have to be respected following the elements below.

The following dimensions are requested to be able to accept a good working of the roll-up door.

$R \text{ mini } \geq 750 \text{ mm}$
 $A \leq 5^\circ$

$L1 \geq 160 \text{ mm}$
 $L2 \geq 190 \text{ mm}$

Example of bending with a combination of the 2 bending above.
