To the technical department

Object : Modification N° 2 « key lock holder modification ».

Dear customer,

We inform you about the modification of our key lock holder for lift bar closing system.

With the old key lock holder *Cf. photo 1*, we couldn't screw at maximum the key lock holder to the round cylinder block without block the shutter's closing rod. At the opposite, an insufficient screwing could make fall the round lock cylinder inside the compartment. We have therefore created a new key lock holder mould more adapted to stop this problem.

Since the week 17, the MCD's shutter equipped with the lift bar system are deliver with this new key holder grey for the powder coated 7035 shutters (standard) *Cf. photo 2* and black for the others finitions (anodized also) *Cf. photo 3*.

Best regards.

MCD's team
