To the technical department

Object : Modification N° 4 « Pull strap modification ».

Dear customer,

We inform you about the modification of our pull strap which is used to close the shutter which are installed too high.

We change our black nylon cord (*cf.picture N°1*) by a red flat strap with the logo MCD on it (*cf.picture N°2*).

With this modification, the strap can't be cut by an intensive use and it will be easier for the user to take in hands. Furthermore, the red colour as well as the principle of a flat strap will improve the visibility and aesthetic of this one.

The principle remains the same with a lower point of fixation on the terminal slat and an upper point of fixation on the flanges of the roller.

Since the Monday 15th of September, all the MCD's shutters equipped with pull strap option will be manufacture with this new red strap.

Best Regards.

The MCD's team.
