To the Puy, The 2<sup>nd</sup> of September 2009

***To the technical department***

**Object : Modification N° 8 «New round cylinder lock».**

Dear customer,

We inform you about the modification of our actual round cylinder lock (Cf. [picture N°1](#)) installed on the bar lift handle with key by a new model (Cf. [picture N°2](#)).

Following some customer's complains about this round cylinder lock, we had notified some small imperfections to solve (security and protection). About the first point, we integrated to the cylinder lock more spangle in order to have an additional level of security to avoid break-in. About the round cylinder protection, some of you determinate a key insertion sometime difficult due to some dirt or dust installed inside the lock. This trouble is now solved using an additional part (shutter) to hide the cylinder of the lock when there is no key inside. We will keep of course some old models in case of after sale and determinate as before, a special number of key for some customer.

From Monday 31<sup>st</sup> of September, all our shutters equipped with bar lock handle with key are delivered with this new round cylinder lock.

Best regards

The MCD's team.
